Kenneth Basjan

//Software Developer
//Entrepreneur

About Me

I am a software developer proficient in C#, Java, Python, HTML, CSS, JavaScript, MERN Stack, and WordPress. I specialise in front-end development and own Weberu, an SMMA providing digital services to boost revenue and brand awareness for businesses around the world.

Work Experience

Weberu (SMMA)
Founder
November 2021 to Present.
Weberu is a social media marketing agency that offers services such as social media management, content creation, influencer marketing, and social media advertising.

- Developed and executed innovative social media campaigns for a range of clients, delivering measurable results and achieving client objectives.
- Built and managed a team of social media experts, overseeing all aspects of the business, including strategy, operations, and client management.

UVU Africa: CapaCiTi Division
Junior Software Developer Intern
January 2023 to July 2023

- Developing web applications using HTML, CSS, JavaScript, Python, and Java, working with a team of experienced developers to create high-quality, user-friendly software solutions.
- Contributing to the development of multiple software projects, using agile development methodologies to deliver results efficiently and effectively.
- Demonstrating strong problem-solving skills and attention to detail, identifying and resolving issues quickly and efficiently to ensure that software solutions are delivered on time and to the highest quality standards.
